

Global Advantech Limited

Environment Policy

Global Advantech is committed to the development of clean technologies, including chemical and biochemical formulations, systems and plant with the principal objectives of minimising environmental impacts and recovering discarded materials. The environment is at the core of our business activities and we endeavour to deliver quality and sustainable solutions to our customers. We are committed to the sustainable management of the environment while continuing to give value for money to our customers.

We will endeavour to:

- Comply with all relevant environmental legislation and codes of practice and implement all new legislative requirements within the timeframes required of us.
- Continuously improve our environmental performance and integrate recognised environmental management best practice into our business operations.
- Reduce our consumption of resources and improve the efficient use of those resources.
- Reduce our emission of greenhouse gases by increasing energy efficiency and our consumption of renewable energy.
- Manage waste generated from our business operations according to the principles of reduction, re-use and recycling.
- Manage our business operations to prevent pollution.
- Give due consideration to environmental issues in the procurement of goods and services.
- Raise awareness of climate change and stimulate sustainable behaviour amongst our partners, contractors and customers.
- Promote appropriate consideration of sustainability and environmental issues in the products and services we provide to our customers.
- Update our Environmental Policy annually in consultation with our employees, customers and other relevant third parties.
